

The background features a cosmic scene with a blue nebula on the left, a bright sun or star in the upper center, and a fiery red and orange landscape on the right. A large, metallic, 3D-style number '4' is positioned behind the main title. The Earth is visible in the top left corner. The title 'GALACTIC CIVILIZATIONS' is rendered in a bold, metallic, sans-serif font with a blue-to-white gradient and a slight shadow. A registered trademark symbol (®) is located at the end of the word 'CIVILIZATIONS'.

GALACTIC CIVILIZATIONS[®]

SUPERNOVA

Key Facts

- **Title:** Galactic Civilizations IV: Supernova Edition (replaces Galactic Civilizations IV)
- **Developer:** Stardock Entertainment
- **Release Date:** October 19, 2023
- **List Price:** \$49.99
- **Platform:** Windows 10 / 11
- **Localization:** English, German, French, Russian, Spanish, Polish, Portuguese, Italian, Simplified Chinese, Korean
- **Players:** 1 to 64 (up to 8 being human)
- **Website:** www.galciv.com
- **Graphic Assets for PR:** <https://www.stardock.com/press/games/galactic%20civilizations%20iv%20supernova/>

Supernova Edition

- The original release of *Galactic Civilizations IV* was the Epic Edition. Released exclusively on the Epic Game Store in 2022.
- **The Supernova Edition** is the version released on Steam (and is available on Epic as an expansion pack).
- **Supernova** takes all the lessons learned from the original release and adds a massive amount of new features.
- Owners of the Epic edition can transfer their key over to steam, via Stardock's [Key Transfer System](#)
- Owners of the Epic edition can upgrade to Galactic Civilizations IV: Supernova Edition for \$14.99 (far less than a typical expansion pack) either on the Epic Game Store or on Steam.

Game Overview

Galactic Civilizations IV: Supernova Edition is the Steam release of the latest entry into the award-winning *Galactic Civilizations* space 4X strategy game series.

The game takes place at the dawn of the 24th century. Your civilization has just achieved faster-than-light travel and now the galaxy is there waiting to be colonized. However, your civilization isn't the only one out there.

As the leader of your civilization you must guide your people to explore the galaxy, colonize new worlds, research new technologies, negotiate treaties and fight wars in an effort to survive in a hostile universe.

Other games in the genre (games we love)

Game Element	Galactic Civilizations IV	Stellaris	Endless Space	Master of Orion	Sins of a Solar Empire
Gameplay System	Turn-based	Real-Time	Turn-Based	Turn-Based	Real-Time
Alien Civs	Included Civs are hand-crafted with modest differences in game mechanics (each Civ has their own ship style, music, etc.). Also supports Generative AI for making custom civs. Modest library of customization options.	Focus on sandbox where the lore is created by the player as they play. Very deep library of customization options.	Civs are hand-crafted with very distinct game mechanics (each Civ has their own ship style, music, etc.).	Civs are hand-crafted with modest differences in game mechanics (each Civ has their own ship style, music, etc.)	Civs are hand-crafted with very distinct game mechanics. Story-Driven Events	Characters and Civs create story-driven events that can have substantial consequences	Characters and Civs create story-driven events that can have major consequences	Random events (Narrative, Global, Interactive)	None	None
Standout Features	Approachable powerful ship design, Strong AI opponents, First game to use AI generation tech (AlienGPT)	First game in the genre to make each game feel like a unique story, Great depth.	Gorgeous with each civilization feeling truly unique	Perfect balance of gameplay, approachability and mechanics	Gorgeous and makes the player feel like they're in a living universe.

KEY NEW FEATURES IN GALCIV IV: SUPERNOVA

ALIENGPT

- Describe your civilization, choose their cultural affinity and personality and press Generate to get a custom civilization with its own history, lore and with stats, abilities, ships and citizen types chosen. AI generation trained on Stardock's existing art library.

TOP-TO-BOTTOM GAMEPLAY CHANGES

- GalCiv IV: Supernova is being developed by the same Stardock team that made GalCiv II (but not GalCiv III) so a lot of gameplay and general feel will be modern revisiting of some of the classic elements of that game.

THE VAULT

- The player will find Precursor artifacts and other items that can be stored in a Vault and used by the player instantly to improve their civilization.

NEW EVENT SYSTEM

- The galaxy is very much alive and responds to the actions of the player as well as other civilization. The deep lore of the Galactic Civilizations series is experienced by players.

CAMPAIGN / TUTORIAL

- NOT in the current build (not until everything is basically done) a new campaign will help give a background on the universe of Galactic Civilizations including the so-called peace-loving humans of Sol III as well as a tutorial to introduce players to 4X strategy game playing.

Walk-Through: The Best Way to Show Viewers

We want to make sure that the game entertains your viewers. If there's something we can add to the game that you think your viewers would like, let us know.

Gameplay that we think will entertain viewers:

Creating a Custom Civ with AlienGPT. Note there is a limit on how many can be made in a setting.

Looking at the different map options. You will want to choose a Small map with a Single Sector for brevity.

Looking at the alien civs to play against. You can hold down the SHIFT key to lock a tool tip to explore stats in a tooltip further.

Story-Driven Events. There are a lot (and more coming) story-based events that in turn change the way things progress in the galaxy.

Ship-Design. The game will make ships for you, but it can be fun to customize ships and make them fit your particular strategy.

Messing with other players. You can get players to go to war with each other and give resources and ships to the side you want to win without getting your hands dirty. This game has uniquely powerful AI features running, use it for fun and pleasure.

Things we are still working on

Content Name	DLC or Expansion	What It Adds	Release Date	Price
Tales of Centauron	DLC	<ul style="list-style-type: none">• Unique Technologies• New Planetary Improvements• New Custom Civ Traits• Dozens of New Lore Driven Events	Released	\$9.99

Tales of the Arnor	DLC	<ul style="list-style-type: none">• Unique Artifacts• New events• New components• Mission Driven Gameplay	Q4 2024	\$9.99

Game Setup: AlienGPT

1. Type in a description.
2. Press 'Generate'.
3. Have fun.

The AI generation is focused on the live text generation for lore and flavor. It matches keywords to an internal art library created by our artists utilizing A.I trained on Stardock's extensive art library. There are a finite number of generations we support per day.

Game Setup: Fleet Style

- We highly recommend picking ship colors that are reasonably light in color so that they are easy to see on screen.
- Some ship styles read better than others.

We recommend against trying to customize every ship on the right side (it would take a long time) but instead focus on the colors, the overall ship style and the primary and secondary textures.

Game Setup: Galaxy Settings

- For streaming, we recommend trying out a SMALL, SINGULAR sector map. This is because of limited time.
- One big strength of GalCiv IV is the massive scale differences it supports with an AI that can adapt. A lot LOT of time has been spent making sure the game is fun on a tiny map as well as the largest map sizes and gameplay is very different based on size.
- Keep the frequencies on Occasional until you are familiar with the game enough to know the consequences of different setups.

Galaxy Size
Small

Number of Sectors
Singular

Star Frequency
Occasional

Habitable Planets
Occasional

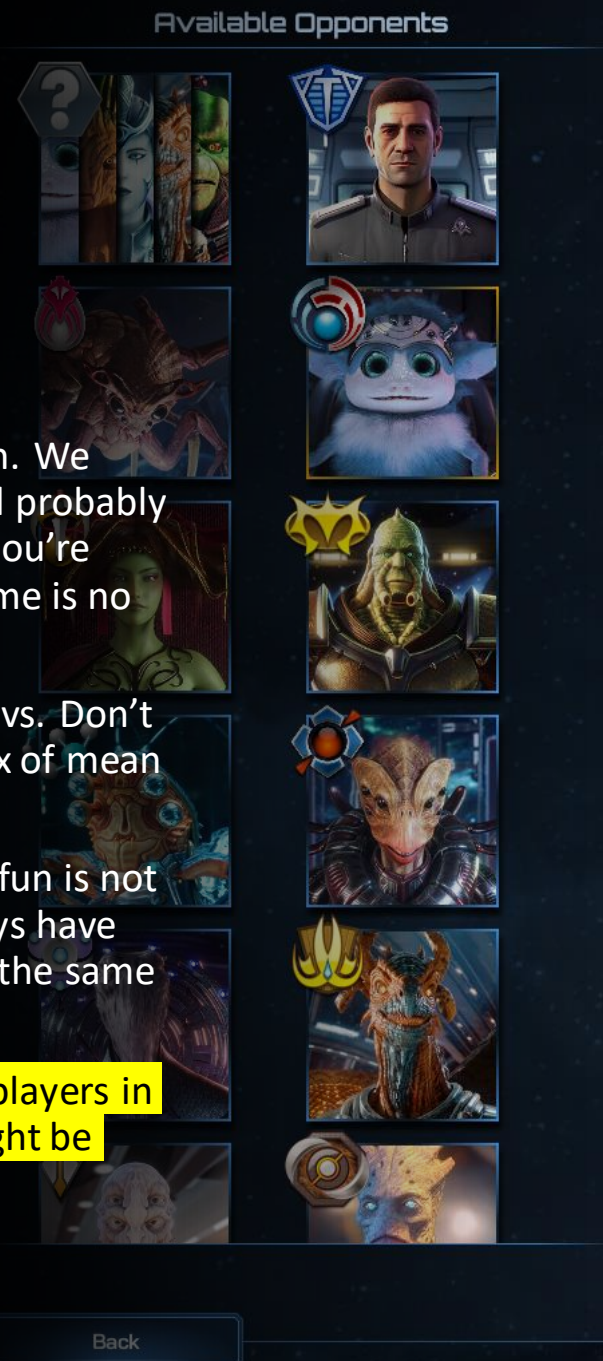

Extreme Planets
Occasional

Resources
Occasional

Game Setup: Opponents

- You can set your difficulty on an earlier screen. We recommend "Normal" for streaming. You will probably lose but it'll be an entertaining loss. (Unless you're really good at these games). The AI in this game is no joke. Choose life.
- Fun in the game is making sure it's a mix of Civs. Don't choose just happy friendly ones. A decent mix of mean (Drengin Empire, the Yor, etc.).
- Biggest mistake new players make for having fun is not paying attention who they play against. Always have some pacifists and some aggressive civs on the same map for sufficient drama.

Generally: Pick only about HALF + 1 the max players in a setting. So if the max is 5, pick 3 or 4 (4 might be more exciting).

Void Reavers

Conquer the cosmos, unleash chaos!

In the vast expanse of the cosmos, where stars ignite and worlds collide, a fearsome faction known as the Void Reavers emerges from the shadows. They are a race of bloodthirsty marauders, akin to legendary orcs of old, who traverse the galaxies in search of conquest and plunder. With their savage ferocity and insatiable lust for power, they strike fear into the hearts of all who dare cross their path. Their ruthless leaders, like criminal overlords of cosmic proportions, orchestrate their nefarious deeds with chilling precision. Fueling their relentless pursuit of dominance is an unwavering devotion to their cause, a twisted belief system that embraces nihilism in its darkest form. These carbon-based creatures, shaped by eons of evolutionary pressures, have honed their bodies and minds into deadly instruments of destruction. Their hulking frames are adorned with battle scars, reminders of countless conflicts fought and won. Armed with advanced weaponry and technology, their ruthlessness knows no bounds. With every victory, their hunger for power grows

Done

Turn 1: Your Civ

- When you start out, if you used AlienGPT to create your civ, you should see whatever wall of text it made for your history. It's pretty entertaining and by its very nature, it'll never occur again.
- LEFT mouse click selects a unit.
- RIGHT mouse click sends it somewhere.
- DOUBLE clicking will bring up details.
- TAB key will take you to the next action.

Turn 1: A look at your Civ

- You start out with some ships: A colony ship that can colonize worlds, a probe and a flag ship.
- The flag ship is equipped with a Survey module that was “found” and lets the ship see and investigate anomalies.

Telescope Takeover

Control Cost 15
Credits Cost 0

Private corporations have advanced survey equipment which we can put to immediate use.
Reveal an Area of the Map

Ready to execute

Turn 1: Executive Orders

- Executive Orders are like Magic the Gathering cards they let you do a thing instantly.
- We recommend getting another colony ship going right away with this on turn 1.

Turn 1: Rush Buying

- Rush buying a ship on turn 1 can be helpful. Just don't overdo it because you will want that money for recruiting leaders and rush buying on your planets.

Turn 1: Planets

- There are CORE worlds which are your big worlds that have huge populations and COLONIES which exist primarily to send back their raw resources.
- IF it's somewhere you might want to live, it's a core world. If it's a place you would want to send your political enemies to, it's a colony

Carnage Prime

- 3
- Class
- Polluti
- Desert

It's a desert
are picture

Turn 1: Strategic Zoom

- One of the unique features of the GalCiv games is strategic zoom. Using the mouse-wheel players can zoom in and out seamlessly.

Durantium

Enormously strong and pliable, Durantium is required for most orbital improvements.

Build a mining starbase nearby to harvest this resource.

Turn 1: Resources

- The galaxy has various special resources.
- Build a starbase nearby and you can mine these resources.
- Each turn, mined resources go into your inventory to use.

... have special insight into these technology candidates - 50% Research Bonus

Turn 1: Tech Tree

- The tech tree will pick up to 3 techs that your scientists have insights on which makes them 50% cheaper.
- We are still doing quite a bit of work on the tech tree to make each civ and play through more unique and make the tech navigator prettier.

Heart of the Empire

Heart of the Empire

Cultural Trait	None
----------------	------

Our homeworld is the core of our civilization, and the pinnacle of who we are as a people.

Influence and Income are only applied to the Homeworld.

Influence Growth	+10%
Gross Income	+10%

Early Game: Policies

- Each Civilization has its own set of policies to play with.
- Policies are often unlocked by your cultural progression tree.
- Your policies determine what type of civilization you have and there are events that come online later in the game based on what policies you have in play.

Automate

Early game: Starbases

- Starbases have an area of effect and should be placed with that in mind.
- Communication starbases spread your influence.
- Mining starbases focus on exploiting resources.
- Military starbases increase the power of your ships and have modules to weaken enemy ships in their area.
- All starbases can investigate Precursor Relics.

rix onboard.

rix for its valuable

Matrix.

Free Extension Matrix ship upgrade

Early Game: Your First Event

- YOUR CHOICES will have a big impact later in the game.
- Every choice you make sets things up for later (think of it like weighting the dice in a D&D game).
- You can also often use events to get money easily.

Early Game: Meeting Aliens

- Researching UNIVERSAL TRANSLATOR tech will let you interact with aliens
- We recommend getting this very early in the game (for streamers).

Cultural Progression

You have 7 Culture Points to spend

Cultural traits are unlocked by spending Culture Points that are produced by your homeworld. The cost of a cultural trait is discounted based on your civilization's affinity towards a given cultural ideology.

Ideologies

- Individualism
- Totalitarianism
- Egalitarianism
- Traditionalism
- Progressivism
- Pacifism
- Nihilism 1
- Collectivism

Ideology Discount: 28%

Detached

Our society has grown so Detached from consumerism that there is plenty of excess goods.

3 free supply ships and +10% income on all worlds.

7 Culture Points

Criminal Ties

Moral Relativism

Exploitation

Early Game: Cultural Progression

- What kind of culture you have will matter late game.
- A lot of the late game story events are affected by these choices
- This system is a big change from previous GalCiv games as they let players customize their civ during the course of the game in big ways.

Early Game: Diplomacy

- Pay close attention to how civs feel about you.
- Some you will want to go to war with and others you will not.
- Trade with the ones you want to avoid going to war with and establish an embassy with them.

Situation Report

Fleeing Scientist

One of our top researchers has fled our world for reasons we won't get into here. Our sources tell us he is hiding on your world.

We would like you to allow us to capture and bring him back.

You may search our world for wayward scientist.

We will not consent to you conducting a manhunt on our homeworld.

No. We will capture him ourselves.

Early Game: Core worlds vs. Colonies

- Most planets are worth colonizing but only some are worth making into a core world.
- Assign a governor to the high-quality planets.
- The low-quality worlds often give out lots of minerals and tech and make for good colonies.
- Colonies feed their resources to the nearest core world.
- This new concept is probably the most popular new feature in GalCiv IV (it's not sexy but we think most 4X games will pick up on this in the future as it dramatically reduces micro-management).

Early game: Managing leaders

- Leaders have a backstory that may lead to a story-driven event.
- Even the guy who wanted to be a chef has an event behind the scenes.

Situation Report

Culinary Dream

Neil Kyrn, one of your most trusted advisors, has confided in you their lifelong dream of opening a restaurant. They were once trained as a chef and have always felt a strong connection to the culinary arts. They've recently discovered an opportunity to open a restaurant on a bustling trade planet, where exotic ingredients and diverse clientele abound. Neil Kyrn seeks your advice and support in pursuing this dream.

Our advisors warn that the time and resources Neil Kyrn would need to invest in the restaurant

Support their dream.

Encourage focus on duties.

Once trained as a chef, this leader has always harbored dreams of opening their own restaurant.

Lightbulb 10 People 5 Lightning 1 Running 8

Early Game: Negotiating a trade deal

- Trading tech for money is a good way to keep your early economy going.
- The AI will propose deals. There is a ton of AI work behind picking those deals. It's NOT random.
- If you think the proposed deal the AI is making is bad, look closely as it's probably a better deal than it first appears.

Early Game: Orbitals

- These are upgrades you can make to your planets.
- We are improving the UI to make these easier to find but for now, press the little green button by a planet card to pick one.

Midgame: Taking inventory

- GalCiv isn't a spreadsheet game...well, except for the spreadsheets.
- And graphs.
- Keeping an eye on how you are doing is important.
- We are still working on the underlying equations we use to measure objective power in a given category.

Mid game: Prestige

- Prestige victory is one of the most obvious improvements to GalCiv IV that we are ashamed we didn't come up with it 10 years ago.
- In strategy games, players usually know that they're going to win (or lose) long before it happens. Prestige victory looks at all the factors and when enabled, lets players gain victory (or defeat) based on a bunch of factors.

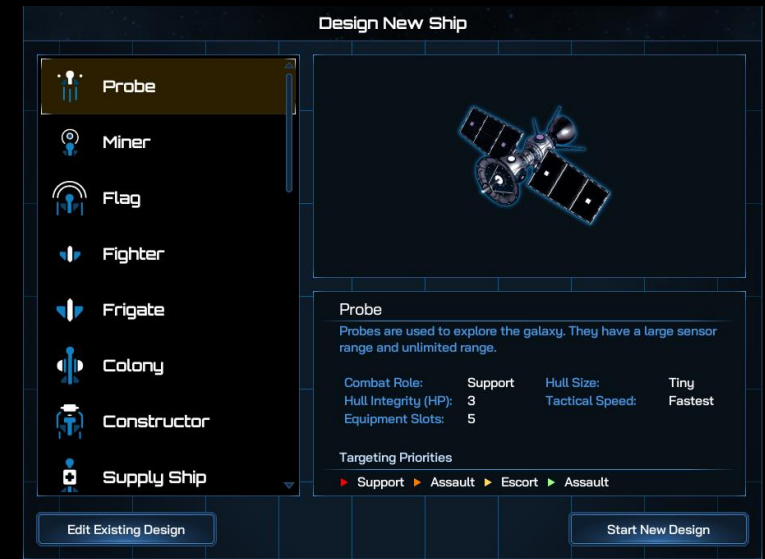

Earn Prestige by building your civilization and completing Galactic Challenges. The below list are the points

Summary

 Military Power	2
 Faction Power	5
 Technology Score	44
 Manufacturing Score	9
 Economic Power	5
 Research Rate Score	21
 Ascension Score	40
 Sector Ownership Score	100
 Population Score	20
 Galactic Challenges	0

Midgame: Designing Ships

- For many players, this is the heart of the game. Designing ships.
- You don't have to design ships, the AI has gotten pretty good at designing ships for players.
- In the final game, players will be able to download ships designed by other players...which means 10,000 versions of the Enterprise.

Mid game: The Vault

- Another very popular new feature in GC4: Supernova. Players collect ~~cards~~ artifacts and can ~~play~~ use them on ships, planets, etc.
- The AI is very good at using these too.

Mineral Scanner

One time use scanner finds previously unknown sources of minerals on a target world of ours.

Effects

 Minerals	+2
---	----

Ready to activate

Mid game: War or other means?

- There are many ways to win and the most fun way depends on the player.
- Often times, a given opponent will have certain resources the player needs and the best path is to simply relieve them of that territory.
- Players can also spread their culture across the galaxy and win that way by getting alien colonies to join you.

Mid Game: Perfect Placement

It can be very satisfying to place a constructor where it can get multiple resources at once.

Mid game: So, it is war

Situation Report

Incoming Message from: Torian Regime

It is time for you to stop terrorizing us. We are done having war brought to us. Now we bring it to you.

(We are at war)

Your worlds will soon be our property

I wish we had found a way to do business together.

Mid Game: Battles and Invasions

- This is a **major new feature** of GC4: Supernova (and a feature we screwed up in GC4 epic and made people mad).
- In GC4: Supernova planets have a planetary defense rating and fleets have a conquest rating.
- The # of turns it takes to conquer a planet is the defense rating / conquest rating.
- If it takes > 10 turns to conquer a planet the player can't invade the planet.
- Siege ships, improving soldiering ability, transports all improve the conquest rating.
