

Stardock Releases DeskScapes 10

Plymouth, MI - April 30, 2019 - Today, Stardock released its highly anticipated Windows® desktop personalization application, DeskScapes 10. The newest version of DeskScapes allows users to personalize their desktop background with animations, pictures, and video, while adding several new community requested features.

“DeskScapes is one of our most popular programs,” said Angela Marshall, General Manager of Stardock Software. “We’ve taken a lot of the feedback we’ve received from our users over the years and developed our newest version, which incorporates new features such as our integrated WinCustomize browser, based on customer feedback.”

Across one or more monitors, DeskScapes provides users with the capability to animate and customize the background on their Windows desktops using static or animated backgrounds that are already provided, or their personal WMV image files. Users can also add over 60 unique effects and recolor their backgrounds. DeskScapes animated backgrounds are saved as .Dream files and are easy to package using DreamMaker, which is included with DeskScapes. Dreams can also be applied as screensavers.

The major new features in DeskScapes 10 are:

- **Seamless WinCustomize library integration** allows direct browsing and downloading of backgrounds from within the application.
- **A new background manager**, complete with the ability to mark “favorite” backgrounds, as well as modifying and saving both static and animated backgrounds.
- **Comes in light and dark theme modes** to suit your personal tastes.
- **Supports h264 videos** with hardware accelerated decoding where possible.
- **New additional effects** you can apply to static and animated backgrounds which can now easily be combined and ordered.
- **New Premium Dreams Included:** Desktop Moon and Desktop Mars

DeskScapes 10 is now available for \$9.99 at <https://www.stardock.com/products/deskscapes>. Visit our [forums](#) to learn more.
