- Define rules to organize your desktop icons.
- Swipe between multiple pages of fences.
- Create a desktop portal from any folder.
- **NEW!** Navigate the folder structure from within the fence.
- **NEW!** Windows 10 compatibility.

# Features

Fences helps you organize your PC by automatically placing your shortcuts and icons into resizable shaded areas on your desktop called fences. Its many customization features are what make Fences the world's most popular Windows desktop enhancement.

## Organize

### Roll up Fences

Eliminate clutter from your desktop - but keep your Fences where it's easy to find them - with our roll up feature. Double-clicking on a Fence's title-bar will cause the rest of the Fence to "roll up" into it, saving you valuable space. To reveal your fence, you can move your mouse over the title-bar or double-click it again to view the title and all of its icons as normal.

### Desktop Pages

Create multiple pages of fences on your desktop and quickly swipe between them. To change to a different desktop page, just take your mouse cursor to the edge of your screen and click and drag. Then a new page of fences will be displayed. This feature provides greater control over how you can organize favorite programs, documents, websites and more.

### Desktop Quick-hide

Instantly clean up your desktop. Double-click any blank space on your desktop and your desktop icons will fade out. Double-click again and they will return. You can even pick icons and individual fences to exclude.

# Control

## Automatic desktop organization

Define rules for how your icons are arranged on your desktop and Fences will automatically sort new icons into the fences you have chosen based on your rules.

## Folder portals

Fences can act as a portal to any folder on your PC. For example, your documents or pictures folders can be mirrored onto your desktop as a fence enabling quick access to their contents without adding clutter to your desktop.

## Customize your Fences

Quickly personalize the labels, background colors and transparency of your fences from the easy to use configuration menu.
