

# Stardock Releases Fences 4 on Steam

*Automatically organize your desktop apps, files, and folders on Windows® 10 and 11*

**Plymouth, MI – August 24, 2022** – Stardock released *Fences*® 4 on Steam today. *Fences* is the world's most popular desktop enhancement and allows users to automatically organize shortcuts and icons on their Windows 11 and Windows 10 desktops into custom-sized spaces.

The robust set of features in *Fences 4* enables an organized Windows desktop and a personalized workflow. With *Fences 4*, users can:

- Create shaded areas to organize their Windows 10 and 11 desktops
- Set rules to automatically organize desktop icons
- Bring fences to the top of their apps for instant access with Peek
- Use folder portals to quickly access files in Explorer
- Swipe between multiple pages of fences
- Customize “show desktop” hotkey functionality

The popular “Peek” feature lets users instantly view their fences by pressing Windows key + space, making accessing content significantly faster. While working in a program like Adobe® Premiere® or Photoshop®, users can bring a folder portal filled with their source footage and images to the surface of their desktop by pressing the configurable hotkey. This eliminates the need to minimize the application and go searching for the required asset in File Explorer.

"This app is designed to deliver a modern desktop productivity experience," said Brad Sams, Vice President and General Manager of Stardock Software. "*Fences* is the best way to organize your desktop, and the “Peek” feature makes it possible to access all the content in your fences at any time and within any application. Your workflow will never be the same.”

*Fences 4* is now available on [Steam](#) for \$19.99 for a single device. For users who would like to bring optimized organization to up to 5 PCs, a multi-device option is available for \$39.99.
