- **Assets:** [Graphical Assets for Fences 5](#)

# What's New in Fences 5

- **Chameleon™** - Blend your desktop content into your wallpaper to reduce desktop distractions while maintaining quick access to your files, folders, and apps.
- **Peek™ Toggle** - The taskbar toggle enables quick access to the patented Peek functionality making it even easier to stay in your workflow.
- **Deployment Tooling** - Advanced deployment tooling designed for enterprise simplifies fleet management with the ability to easily export a configuration and load it on login.
- **Kiosk Functionality** – Easily lock content and configurations from end-user manipulations.
- **Quality of Life** – Updated configuration UI makes it more intuitive to customize settings, easier access to frequently used options, and enhanced application performance.

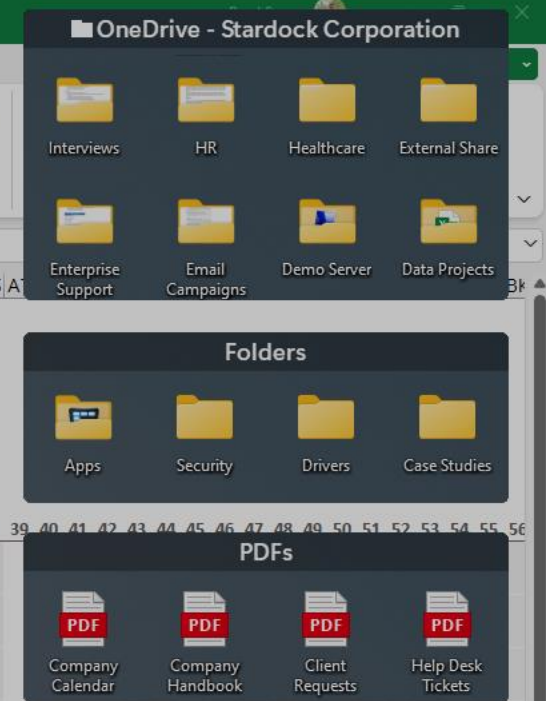

# Chameleon™

- **What is Chameleon** - A Windows desktop icon technology that blends your desktop icons into your wallpaper. Icons maintain their functionality but fade into the background to remain easily accessible without being a distraction.
- **Options** – Effect can be applied to a fence or to icons on the desktop – the user can specify if it applies to all desktop content or specific content.
- **Personalize** – Chameleon effect can be customized with various degrees of blending, mouse over options, and more.

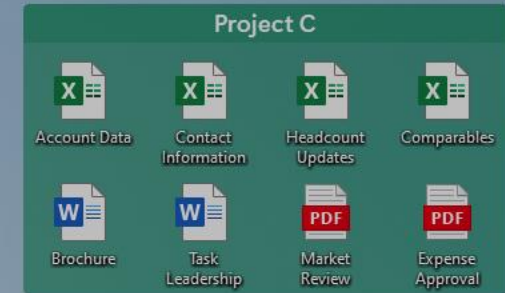

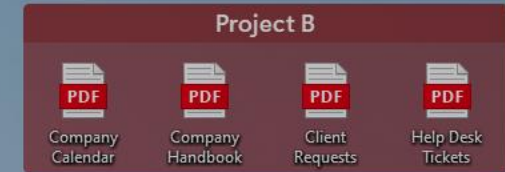

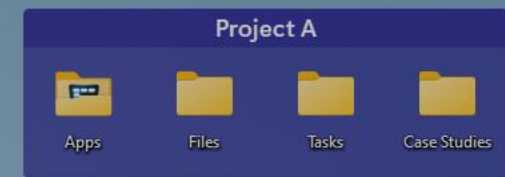

# Peek™

- **What is Peek?** – Introduced with Fences 4, our patented Peek allows you to bring your Fence groups to the top-most layer of the desktop for instant access to your content.
- **Peek Toggle** – Building on the patented Peek functionality, Fences 5 enables the ability to access your Fence groups from the taskbar by adding an icon to the taskbar to instantly access your desktop groups.
- **Hot-Corner** – To provide flexibility, Fences 5 also introduces a new option to enable peek by clicking the right edge of the taskbar. This is a good option for customers who want to access Peek™ with a mouse click but do not want another icon on the taskbar.

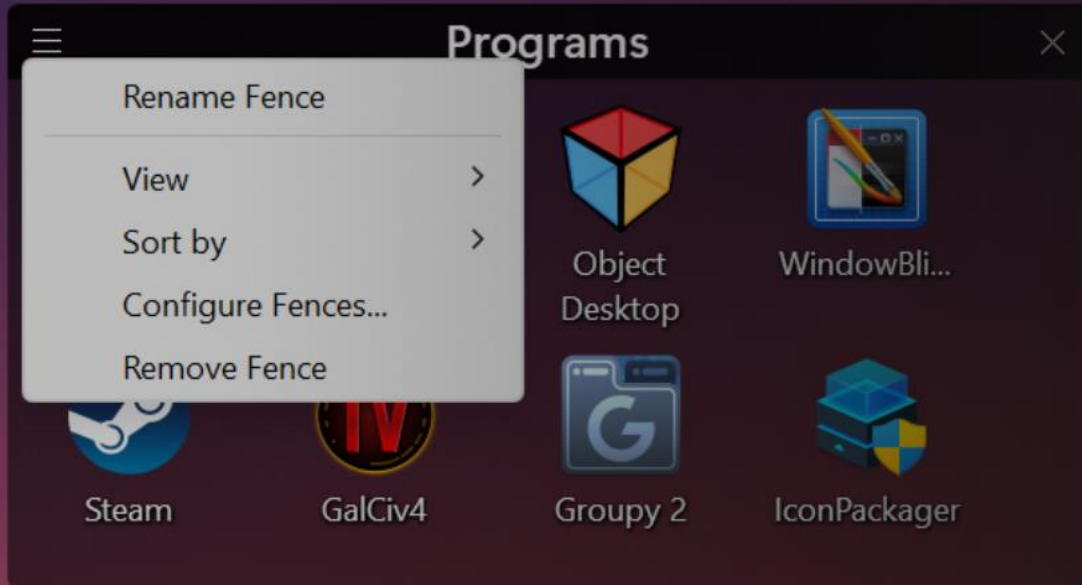

# Enterprise Deployments

- **Import / Export** – Deployments have never been easier with new functionality that makes it easy to import and export configurations with a single file.
- **Kiosk Mode** – With new functionality that lets admins lock the configurations on the desktop, Fences 5 allows IT Admins to easily manage desktop experiences.
- **Login Load** – Fences 5 enables the ability to load a custom configuration on login from either local or remote storage. This feature allows for devices with multiple users to have unique layouts based on their function.
- **License Management** – Centralized licenses controls makes it easier to manage your fleet of devices.

# Quality of Life

- Easily change frequently accessed options directly from a Fence.
- Configuration panel re-organized for easier navigation.
- Improvements to localization and translations.
- Enhancements to the core Fences desktop engine that results in improved performance and enhanced capabilities.
- And a lot more!
