Start11 Enhances Windows 11 And Restores Classic Functionality

Learn more about Start11 at www.stardock.com

Plymouth, MI – November 03, 2021 – Stardock released *Start11*™, a program that allows users to customize the Windows® Start menu and taskbar, today. As with previous editions of StartX products, *Start11* allows users to restore the Start menu to appear as it does in previous versions of Windows, as well as customize and enhance its functionality.

"Since Microsoft first announced Windows 11, we have been working to optimize Start11 for the new operating system" said Brad Wardell, Stardock CEO. "We make it easy for users to customize nearly every detail of their PC experience, including being able to choose from several new Start menu layouts and repositioning the taskbar, among many other things."

Start11 is designed for Windows 11 and Windows 10 and comes loaded with features intended to make Windows more personal and productive. *Start11* supports moving the Start button to the middle or to the left, adjusting the taskbar size, re-ordering quick access shortcut lists, options for grid spacing, enhanced classic and modern search experiences, restoring the taskbar context menu, and more. *Start11* also fully integrates with Stardock's *Fences* app.

For users who want to personalize their Start menu, *Start11* offers robust customization options ranging from aesthetic to functional. The software enables enhanced Windows 10 and Windows 11 style Start menus, a compact Windows 7 design, optional Windows 11 style for classic menus, and additional settings that allow you to configure a personalized Start menu.

The new UI has been designed to support additional Start menu enhancements, extending support to a host of new Start menu ideas like pages, minimalism, and features for enterprise customers. While *Start11* does restore previous versions of the Start menu like *Start8*® and *Start10*®, it now provides robust options to create a truly personalized experience.

Start11 is now available starting at $5.99 through Stardock, with an upgrade option for users of *Start8* and *Start10*. It is also included in the [Object Desktop](#) suite. For more information, visit the *Start11* page [here](#) or www.stardock.com.
