

Stardock Releases Start11 v2

New Start Menu Designs, Taskbar Enhancements and Enterprise Features are
Now Available

Plymouth, MI. – November 8th, 2023 - Stardock released Start11 v2, the industry's most advanced Start menu, today. This program allows users to fully customize the Windows 10 and 11 Start menu experience with unique features, designs, and restore classic functionality from previous versions of Windows.

New with Start11 v2 are three new Start menu styles that seamlessly blend with Windows 10 and 11. Each new style is centered around a different theme: Apps, Professional, and Launcher, and are fully customizable from top to bottom.

Start11 v2 is also enhancing the taskbar with new functionality that makes it faster to access your files and folders. By using our new folder menu option, you can pin any folder to the taskbar and access its contents directly from the taskbar without opening File Explorer.

And new today, you can round the corners of the taskbar to give it a modern design that makes your desktop look like the next version of Windows.

"This is a significant update and ships with more than two dozen new features" said Brad Sams, General Manager of Stardock Software. "And we are also introducing new enterprise features as well, including the ability to load a Start menu configuration on login, kiosk functionality that lets you lock components of the Start menu, and improved tooling for advanced deployments."

Also new with Start11 v2 is an updated search experience with native integration with the Everything search engine. Additionally, Start11 v2 introduces the ability to backup and restore your settings from a file, improved animations when navigating within the Start menus, tinting for a unified icon experience, options for removing folders from the 'all apps list', and many more.

Start11 v2 is available today for \$6.99 and it is also included in the award-winning [Object Desktop suite](#). For more information, visit the Start11 v2 website [here](#).
